Close in Less Time**

**Gain Insight with
Robust Reporting**

**Empower Member
Agencies with Access
to Technology**

Networks, alliances, and aggregators have unique needs when it comes to technology. They need a platform that allows them to not only process their own business but to onboard and have visibility into their member agencies, as well as provide them with access to tools and services to help them succeed and grow.

XDimensional Technologies understands these needs and its Nexsure Insurance Platform is the only tool on the market that can address all of them.

The Nexsure Insurance Platform is a SaaS-based platform that manages the entire policy workflow, including submission, underwriting, and issuance. It is ideal for supporting networks, alliances, and aggregators as it gives them the ability to streamline processing, enhance partner and member management and gain insight into it all.

Run Your Business with a Complete and Efficient Solution

With one comprehensive solution with all your processing and management needs, you can expect your business to soar on the Nexsure Insurance Platform.

Our complete solution integrates, streamlines, and coordinates processes, driving up business efficiencies and performance. You'll tackle business volume with ease, make distribution partner access simple and productive, deliver an exceptional user experience, and eliminate the frustrations related to multiple vendors – e.g., patchworked programs, swivel-seat data entry, and administrative overhead. Now, you'll benefit from one comprehensive solution, from one vendor, on one technology platform. When you combine that with your expertise, knowledge, and specialties, you'll deliver an unbeatable market offering.

Rate, Quote and Close Business in Less Time

With efficient data entry and automated workflows, plus real-time alerts, and notifications, you'll always be kept abreast of requests, responses, actions, and next steps. You'll move sales transactions along quickly and close more business, driving up premium volume and revenue.

Handle Business Volume with Ease

The inherent processes of the Nexsure Insurance Platform are extraordinarily efficient, allowing you to scale your business to any size and drive profitability. The platform accelerates processing and distribution, allows for expanded capabilities, and simplifies business management to achieve exceptional results.

Onboard Member Agencies Effortlessly

With efficient onboarding processes and the flexible automation of administrative tasks that are important to you, you can easily sign up and manage more qualified agents in less time.

Our Member Agent Portal streamlines business submissions, workflows and adds self-service capabilities to empower your member agents to engage, connect, transact efficiently, and communicate with you independently, anytime. With the portal, retail agents can control, manage, process, and query information without your involvement, saving an enormous amount of time.

You'll be able to effortlessly manage contracts, licenses, and E&O across all your states, and reduce the complexities of compliance management. You can apply the time saved to other important work.

Empower Member Agencies with Access to Technology

As an XDimensional Technologies customer, your member agencies can gain access to the Nexsure Insurance Platform. We've developed a simplified implementation with key functionality enabled to get them up and running quickly. As they grow, they'll have the full platform behind them being able to turn on more and more functionality as needed.

Gain Insight with Comprehensive Detailed Reporting

The Nexsure Insurance Platform is continually logging data across the breadth of your transactions, data entry, partner activity, and automation, building the most sophisticated and complete relational data set available for reporting. Benefit from a full breadth of financial, accounting, operational, departmental, and compliance reports (bordereau), as well as advanced reports for measuring, evaluating, and implementing changes. View virtually any report on the fly, such as retail agent commissions, carrier commissions, and sales pipeline. With performance assessment tools, you can evaluate employee, distribution partner, and client workloads, to see who's really making an impact (favorably or unfavorably) on profitability, time, and resources.

The Nexsure Insurance Platform is the right solution for networks, alliances, and aggregators. To learn how you can manage and empower your business and your members' businesses, contact us today.
