neXsure
insurance platform

for MGAs, Program Administrators, and Carriers

XDimensional Technologies

Run Your Business Comprehensively for Exceptional Results

From submission intake and management to policy issuance, to commission management and accounting, the Nexsure Insurance Platform does it all.

Your solution can be as comprehensive as you like, incorporating the full quote to policy management lifecycle. You simply choose the features you need and the platform does the rest. Configuring the platform to support the unique attributes of your product is part of the standard implementation process.

Our cloud platform releases you from systems integration, updating, and IT management. It's hands-off with a single unified solution that meets your exact needs, and will grow with you. Our configurable solutions accommodate a diversity of custom and standard lines to meet all your product needs.

Add New Products and Programs Quickly; Engage and Expedite with Online Submissions; Automate and Streamline Processes

Receive and Transact the Business You Want

Our engines, algorithms, and rules, built for your needs, rigorously filter, sort, evaluate, and process. They can fully automate, or just assist, in underwriting and rating your risks. As you learn more about your risks and exposures, you can quickly incorporate changes to refine or further align your appetite, making your business more adaptive, focused, and predictable.

Turn Your Products and Programs Into Reality

Our team sets up your products and programs to your specifications from online submissions through underwriting, rating and quoting, binding and issuance, into a single unified process. With deep functionality, streamlined implementations, and our experienced team, you will get to market faster with new products and programs.

Portals Expand Opportunities

Portals streamline business submissions, workflows and add self-service capabilities. They empower your retail agents and distribution partners to efficiently engage, connect, transact, and communicate with you independently, anytime. Your distribution partners will take control, manage processes, and query information without your involvement, saving substantial time.

Boost Productivity; Enhance Relationships

With built-in integrations that eliminate manual entry and a powerful dashboard that delivers real-time alerts, notifications, and essential information on quotes, cancellations, and more, your team will be able to work more efficiently and effectively. Our platform also automates processes and routine communications to help you enhance relationships and direct your time to more complex tasks.

Exceed Goals with Business Intelligence

Gain insights, knowledge, and intelligence from comprehensive reporting to optimally manage and guide your business. With the platform, you will always be informed and know your business in detail, to make the best possible decisions today, and plan for tomorrow.

A modern core insurance platform to manage and grow your business.
